

Turn Your Hot Tub Into a Multimedia Center

Impress your friends while you entertain or create a romantic and relaxing atmosphere with one of our three optional entertainment systems. With each system you'll experience quality sound emitted from four integrated and illuminated speakers. Since every Limelight hot tub is built entertainment-ready, you can add a system at any time – now that deserves a standing ovation.

Integrated MP3 Sound System

Integrated into the hot tub cabinet, this system features an iPod® dock and an auxiliary input for other MP3 players. Also included is a mini waterproof remote that allows you to control iPod track and volume from inside or around your hot tub.

Wireless Sound System

With the system's wireless iCast® transmitter placed securely inside your home, it's easy to enjoy virtually any audio source you choose: iPod, MP3, satellite radio, AM/FM radio, CD/DVD player, audio files on your computer, and more. Control the iPod track and volume from your hot tub control panel.

Wireless TV & Sound System

For complete entertainment, add the excitement of a Wireless TV to the Wireless Sound System. Transmit your favorite show from your home TV wirelessly, whether it's cable, DVD, or satellite. There's no need to run cable to your hot tub nor place a DVD player outside. If it's on inside, it's on at your hot tub! The 17" widescreen LCD TV that attaches to your hot tub cabinet is waterproof and temperature resistant. It comes with a protective vinyl cover and a mounting bracket that rotates 350° so you can enjoy the TV from anywhere in your backyard.

Enhance your ownership experience with one of our optional cover removal systems.

Delivering an Award-Winning Performance Every Time. Bravo! Limelight®
